TOUCH CLERK GROUP PERMISSIONS
SDF DATABASE TOOLS

	PERMISSIONS WITH OPTION SELECTED ✔
OPTIONS	
SDF DATABASE TOOLS	A control on whether any SDF Database Tools listed below can be accessed by the Clerk Group. This is the local database on each POS Terminal.
Backup Local Data	Allows Clerks to backup the local database on a POS Terminal and send to the server.
Recreate Database	Allows Clerks to recreate the local database on a POS Terminal from scratch, loosing any sales data which may be contained/cached in the database. Suggested to restrict this to POS Support staff only.
Reset and Upgrade Touch Database	Allows Clerks to re-run database upgrade procedures on a POS Terminal if they think it hasn't been run successfully during a Software Update. Suggested to restrict this to POS Support staff only.
Restore Local Data	Allows Clerks to restore the local database on a POS Terminal from a backup file, loosing any sales data which may be contained/cached in the current database. Suggested to restrict this to POS Support staff only.
Shrink Database	Allows Clerks to shrink the local database on a POS Terminal. Suggested to restrict this to POS Support staff only.
